DETAILED ACTION

1. Applicant's cancellation of claims 1-2 and 10-43 and addition of new claim 44 in Paper filed 20 January 2004 is acknowledged. Claims 3-9 and 44 are pending.

Withdrawal of Objections and Rejections

2. Applicant's amendments to claims 3-9 have overcome prior rejections that have consequently been withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3-5, 9 and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Wong (US 5,614,615). Wong teaches Sialyl Lewis X mimetics incorporating fucoseptides. These mimetics are peptides and ligands for adhesion molecules. Thus, the reference anticipates the claimed invention.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1653

Claims 9 and 44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 9 and 44 add a limitation indicating that the molecules of further enhance to increase stability or binding. However, this limitation has not indicated what structural features are required to produce a molecule with these enhances properties.

Conclusion

5. Claims 6-8 are directed to allowable subject matter as the sequences are free of the prior art.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1653

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
